6. At the time of the initial incident, Respondent was employed as a Registered Nurse with Brownwood Regional Medical Center, Brownwood, Texas, and had been in this position for one (1) month.
7. On or about November 20, 2008, while employed as a Registered Nurse with Brownwood Regional Medical Center, Brownwood, Texas, Respondent lacked fitness to practice professional nursing, in that she returned from lunch and was unable to focus, she appeared anxious, her demeanor then went from anxious and hyperactive to lethargic in a short period of time, and staff reported that she appeared impaired while on duty. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
8. On or about November 20, 2008, while employed as a Registered Nurse with Brownwood

Regional Medical Center, Brownwood, Texas, Respondent engaged in the intemperate use of Amphetamines and Methamphetamines in that she produced a specimen for a for cause drug screen that resulted positive for Amphetamines and Methamphetamines. Possession of Amphetamines and Methamphetamines is prohibited by Chapter 481 of the Texas Health & Safety Code (Controlled Substances Act). The use of Amphetamines and Methamphetamines by a Registered Nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patient's condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.

9. In response to Findings of Fact Numbers Seven (7) and Eight (8), Respondent states that November 20, 2008, was an incredibly busy and stressful day for her due to bot work-related and personal issues; that at no time prior to or during work that day did she take or abuse a controlled substance; and that the positive results of her drug screen were due to a "momentary loss of judgement a few days prior".
10. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances.
