

Respondent's complete vocational nursing employment history includes (continued):

3/03	Unknown	
04/03-04/07	LVN	Atlantic City Regional Medical Center Atlantic City, New Jersey
04/03-04/07	LVN	Medical Staffing Network Tuckerton, New Jersey
05/07-06/10	LVN	Valley Baptist Medical Center Harlingen, Texas
07/10-Present	Not employed	in Nursing

6. At the time of the initial incident in Finding of Fact Number Seven (7), Respondent was employed as a Licensed Vocational Nurse with Valley Baptist Medical Center, Harlingen, Texas, and has been in this position for approximately two (2) years and nine (9) months.
7. On or about February 17, 2010, while employed as a Licensed Vocational Nurse at Valley Baptist Medical Center, Harlingen, Texas, Respondent lacked fitness to practice nursing in that she was admitted to the Emergency Room with reported pancreatitis symptoms; however, her diagnosis was changed to a substance abuse diagnosis of Oxycodone Dependence. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
8. On or about April 13, 2010, while employed as a Licensed Vocational Nurse with Valley Baptist Medical Center, Harlingen, Texas, and participating in the Texas Peer Assistance Program for Nurses (TPAPN), Respondent lacked fitness to practice nursing in that when assessed she was given a diagnosis of Opioid Dependence and Opioid Withdraw. Simultaneously, TPAPN received notice she had been taken to treatment at Starlite Recovery Center, Kerrville, Texas, and was admitted. On April 20, 2010, Respondent was administratively discharged for bringing, using and distributing Oxycontin at the treatment center. Respondent admitted to giving Oxycontin to other patients at the treatment center. Respondent was given a urine drug screen test prior to her discharge and the result was positive for Oxycontin. Respondent's condition may have prevented her from delivering safe nursing care due to her dependence on Opioids. Additionally, Respondent endangered patients in treatment at Starlite Recovery by providing them with Oxycontin, a Schedule II controlled substance, which may have compromised their treatment and sobriety.

9. On May 5, 2010, while participating in the Texas Peer Assistance Program for Nurses (TPAPN) Respondent was admitted to Summer Sky Treatment Center in Stephenville, Texas, where upon admission her diagnosis was updated to Opioid Dependence and Major Depressive Disorder. Once Respondent completed her treatment on June 1, 2010, she became non-compliant with the terms and condition of TPAPN when she began missing consecutive calls and failed to call for drug testing fifty-six (56) times, and missed a urine drug screen on September 7, 2010. Respondent's condition could have affected her ability to recognize subtle signs, symptoms or changes in patients' conditions, and could have affected her ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patients in potential danger.
10. In response to Findings of Fact Numbers Seven (7) and Eight (8), Respondent states that the alleged facts are true. Respondent states that she did not realize that failing to make the required phone calls would constitute TPAPN considering her quitting the program. Additionally, Respondent states at that time the cost of the lab fees were a financial burden to her and she was not able to afford to pay for the fees. Respondent states she has continued to attend Twelve Step Program support group meetings.
11. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
