

Respondent's nursing employment history continued:

2002 - 12/2004		Unknown
01/2005 - 07/2005	CCU RN	Tucson Medical Center Tucson, Arizona
08/2005 - 02/2006	Travel Nurse	Richard's Healthcare Austin, Texas
03/2006 - 06/2006	Travel Nurse	Richard's Healthcare San Antonio, Texas
07/2006 - 06/2008	CCU RN	All About Staffing San Antonio, Texas
07/2008 - Unknown	Surgical ICU RN	Baptist Medical Center San Antonio, Texas

6. At the time of the initial incident, Respondent was employed as a RN in the Surgical ICU with Baptist Medical Center, San Antonio, Texas, and had been in this position for seven (7) months.
7. On or about February 6, 2009, while employed at Baptist Medical Center Hospital, San Antonio, Texas, Respondent inappropriately administered Packed Red Blood Cells (PRBCs) to Patient Number A0903200908, through an intravenous (IV) line that was infusing Dopamine. Per the facility's policy/procedure, Dopamine and PRBCs are to be infused via separate tubing and separate sites to avoid adverse reactions. Respondent's conduct was likely to injure the patient from potential adverse medication reactions, including possible demise.
8. In response to the incident in Finding of Fact Number Seven (7), Respondent states that when the patient returned from surgery, her condition was stable but critical and that Dopamine was infusing into a peripheral IV line in the patient's right arm to address the patient's hypotensive state. She checked the IV in place in the left arm and found it to be leaking. Respondent states: "Faced with the inability to start a line (IV) and the blood now up on the unit, I was looking at a dilemma. Blood needs to be transfused within 30 minutes, the patient's condition warranted the need for blood and I was with limited IV access. I made the decision to infuse both the Dopamine and the blood in the same line." Respondent further states: "I feel horrible for the decision I made that day. I made a mistake. I should have asked for help." "I was scared and really did not want the patient to die. She needed the Dopamine and she needed the blood. Things happen so fast in the ICU and decisions have to be made quickly. My decision to infuse Dopamine and blood together was wrong."
