12/03-Unknown	Staff Nurse Hampton at Pearland Assisted Living Pearland, Texas
3/04-5/04	Staff Nurse AMED Community Hospice Pasadena, Texas
5/04-Present	Unknown

6. At the time of the incident, Respondent was employed as a Staff Nurse with AMED Community Hospice, Pasadena, Texas, and has been in this position for approximately two (2) months.
7. On or about May 5, 2004, while employed with AMED Community Hospice, Pasadena, Texas, Respondent was involved in a motor vehicle accident in Webster, Texas, while on duty. As a result, Respondent sought medical attention and submitted a specimen for drug screening which tested positive for Opiates and Benzodiazepines. Possession of Opiates and Benzodiazepines is prohibited by Chapter 481 of the Texas Health and Safety Code (Controlled Substances Act). The use of Opiates and Benzodiazepines by a nurse, while subject to call or duty, could impair the nurse's ability to recognize subtle signs, symptoms or changes in the patient's condition, and could impair the nurse's ability to make rational, accurate, and appropriate assessments, judgments, and decisions regarding patient care, thereby placing the patient in potential danger.
8. On or about January 13, 2005, Respondent underwent a chemical dependency evaluation performed by Patricia P. Corke, M.D., P.A. Respondent reported to Dr. Corke a medical history which included degenerative joint disease, for which she takes Vicodin, and she also reported taking Restoril at bedtime. Respondent also admitted that she had a positive drug screen in 2000 for benzodiazepines. Respondent denied that her positive drug screens had to do with substance dependence. Respondent was very adamant that she did not have a substance dependence problem, however, she did not feel she could do without Hydrocodone and Restoril even when alternative medications were recommended by Dr. Corke. Dr. Corke concluded that she does not have any positive evidence that Respondent is substance dependent, but she cannot rule out that possibility.
9. On or about July 11, 2005, Respondent underwent a pain management evaluation performed by Andrew G. Varady, M.D., DABR, CAQ Neuroradiologist. Dr. Varady states that Respondent does exhibit a history of lower back pain of a type that requires medical management to include prescription medication. However, Dr. Varady believes that Respondent is not a candidate for pain management at the present time as her back pain is

not the type of quality in his opinion that would require current pain management procedures such as epidural steroid injections or facet injections. Dr. Varady states that if symptoms reoccur or worsen, Respondent should be re-evaluated at that time for possible immediate pain management procedures.
