BEFORE THE TEXAS BOARD OF NURSING

In the Matter of Registered Nurse §
License Number 571371 § AGREED
issued to MICKEY REYNOLDS CHAPPELL § ORDER

On this day the Texas Board of Nursing, hereinafter referred to as the Bc considered the matter of MICKEY REYNOLDS CHAPPELL, Registered License Number 571371, hereinafter referred to as Respondent.

Information received by the Board produced evidence that Respondent may have violated Section 301.452(b)(1),(9)&(10), Texas Occupations Code. Respondent waived representation by counsel, informal proceedings, notice and hearing, and agreed to the entry of this Order offered on October 31, 2009, by Katherine A. Thomas, MN, RN, Executive Director, subject to ratification by the Board.

FINDINGS OF FACT

1. Prior to the institution of Agency proceedings, notice of the matters specified below in these Findings of Fact was served on Respondent and Respondent was given an opportunity to show compliance with all requirements of the law for retention of the license.
2. Respondent waived representation by counsel, informal proceedings, notice and hearing, and agreed to the entry of this Order.
3. Respondent is currently licensed to practice professional nursing in the State of Texas.
4. Respondent received an Associate Degree in Nursing from Trinity Valley Community College, Kaufman, Texas, on May 1, 1991. Respondent was licensed to practice professional nursing in the State of Texas on August 26, 1991.
5. Respondent's professional nursing employment history is unknown.

6. On or about June 12, 2007, the Board of Nurse Examiners for the State of Texas issued Respondent an Agreed Order that required him to apply to and be accepted into TPAPN, and once accepted to comply with all the requirements of the TPAPN contract during its term. A copy of the Findings of Fact, Conclusions of Law, and the Agreed Order dated June 12, 2007, is attached and incorporated, by reference, as part of this Order.
7. On or about November 18, 2008, Respondent produced a specimen for a random drug screen requested by Texas Peer Assistance Program for Nurses which resulted positive for THC.
8. On or about November 18, 2008, Respondent failed to comply with the Agreed Order issued to him on June 12, 2007 by the Board of Nurse Examiners for the State of Texas. Non-compliance is the result of Respondent's failure to comply with Stipulation Number Three (3) of the Order, which reads:

(3) "RESPONDENT SHALL comply with all requirements of the TPAPN contract during its term.

On or about October 17, 2008, Respondent produced a diluted specimen for a random drug screen requested by TPAPN.

On or about November 18, 2008, Respondent produced a specimen for a random drug screen requested by TPAPN which resulted positive for THC.

9. In response to Findings of Fact Number Seven (7) and Eight (8), Respondent states: He was shocked that the test was positive to the point that he offered a 9 month hair follicle test at his own expense to prove that he has not used marijuana. Respondent had a U.A. done 2 days later which was negative. Respondent believes that his test was a false positive. Respondent maintains his sobriety date is July 7, 2007. Through his example, two of the Respondents close friends have actually quit smoking marijuana.

Respondent was having kidney problems, instead of drinking soda, his usual beverage of choice, he was drinking a lot of water because Respondent did not want any medication possibly giving false results for the random U.A.'s.

10. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.

CONCLUSIONS OF LAW

2. Notice was served in accordance with law.

- B. On October 31, 2005, Respondent was charged with the Class B misdemeanor offense of Indecent Exposure. Respondent was granted deferred adjudication and sentenced to one (1) year of probation and assessed a fine in the amount of six hundred dollars (\$600.00).
7. On February 8, 2007, Respondent was seen by Antoinette R. McGarrahan, Ph.D. to undergo a forensic psychological evaluation to include a polygraph examination.

Dr. McGarrahan reports that "Mr. Chappell acknowledged a history of substance abuse. He reported that he has been smoking marijuana approximately once per month since he was 16 years old, with the last time being two weeks ago. He denied that he has ever gone to work under the influence of marijuana, although he admitted that, on occasion, he will smoke marijuana in the evening after work when he has to report to work the next morning. Mr. Chappell admitted to having some legal difficulties as a result of his marijuana use. He reported that he was arrested twice for possession of marijuana (under two ounces). He indicated that the first occasion was in 1984 and that he received six months of deferred adjudication, which he successfully completed. He related the second incident was in 1994 for which he successfully completed one year of deferred adjudication as well. He reported that he consumes alcohol only occasionally. He reported that he has never been referred for or undergone substance abuse treatment. Mr. Chappell generally responded to test items in an open and forthright manner, although there were some indications that Mr. Chappell denied and/or minimized problems associated with drug and alcohol use. Results of the Substance Abuse Subtle Screening Inventory-3 revealed a high probability for the presence of a substance dependence disorder in the context of a non-defensive response style."

Dr. McGarrahan states that Respondent does meet diagnostic criteria for a substance abuse disorder, namely cannabis abuse, and with the implementation of an outpatient substance abuse treatment program, as well as random urine drug screening tests, Respondent will likely be able to be in accordance with Board rules concerning generally accepted nursing standards and professional conduct, and will likely be able to refrain from unprofessional conducts as defined by Board rules. The results of the polygraph examination indicated that Respondent was being truthful during the examination, with no deception indicated.

8. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
9. Respondent's compliance with the terms of a Board approved peer assistance program should be sufficient to protect patients and the public.
