8. Regarding the conduct outlined in Finding of Fact Number Seven (7), Respondent states that separate Medication Administration Records (MAR) were not used for their medications, and that they relied on the monitoring staff to document it for them. She states that these documents can easily be altered by deleting the drugs or not recording them at all.

5/21/08 1554	3229367	Midazolam 5ml amp (1)	None	None	None

Respondent's conduct was likely to injure the patients in that the administration of Fentanyl, Midazolam and Morphine without valid physician's order could result in the patient suffering from adverse reactions.

10. Regarding the conduct outlined in Finding of Fact Number Nine (9), Respondent states that medications were administered with the physician in the room, and he could then sign the cath report which served as their order, MAR and notes. She states that most physicians would dictate the administration amounts in the notes.
11. On or about May 7, 2008 to May 21, 2008, while employed with Dallas Regional Medical Center, Mesquite, Texas, Respondent removed Fentanyl, Midazolam and Morphine from the facility medication dispensing system for patients but failed to follow facility policy and procedure in place for the wastage of the unused portions of the Fentanyl, Midazolam and Morphine. Respondent's conduct was likely to deceive the hospital pharmacy and placed them in violation of Chapter 481 of the Texas Health and Safety Code (Controlled Substances Act).
12. Regarding the conduct outlined in Finding of Fact Number Eleven (11), Respondent states that all drugs she removed were either given to the patient or wasted properly. She states that at night she would call the house supervisor to the lab and witness the wastage or she would take them to nursing floor and have the accepting nurse witness it with her, and they would both sign the cath report with the proper documentation of the wastage and the amount. She also states that when cases were cancelled after they set up for them, she would document the wastage and method on a nurse's progress note and have another nurse co-sign with her.
13. On or about May 7, 2008 to May 21, 2008, while employed with Dallas Regional Medical Center, Mesquite, Texas, Respondent misappropriated Fentanyl, Midazolam and Morphine belonging to the facility and patients thereof, or failed to take precautions to prevent such misappropriation. Respondent's conduct was likely to defraud the facility and patients of the cost of the medications.
14. Regarding the conduct outlined in Finding of Fact Number Thirteen (13), Respondent states that she never defrauded a patient's financial account or the institution and proper documentation was made to show wastage and disposal of the drugs. Respondent adds that due to the severely hostile environment she was working in and the heavy work load, any error that was made regarding documentation was unconsciously and without malice or harm to anyone. Respondent states that she requested a drug test to clear any suspicions regarding herself but was denied.
15. The Board finds that there exists serious risks to public health and safety as a result of impaired nursing care due to intemperate use of controlled substances or chemical dependency.
16. Formal Charges were filed on September 9, 2010.
17. Formal Charges were mailed to Respondent on September 13, 2010.
